

What type of plug & socket is used in Thailand?

In the past,Thailand conformed to the American plug and socket standard (types A &B),which,from a safety perspective,was not the wisest choice. After all,type A and B plugs are supposed to be connected to power outlets that supply between 100 and 127 volts and wall sockets in Thailand operate at 230 volts.

What type of power outlet does Thailand use?

Thailand uses power outlets and plugs of types A,B,C &O. Take a look at the pictures below to see what these plugs and power sockets look like: Doesn't look familiar? Do the outlets look different in your country? You'll need a power plug adapter. Type A - Mostly used in the US,Canada,Mexico,Central America,China and Japan.

What is the voltage in Thailand?

Just like most of the world,the voltage in Thailand is 230 voltsand the frequency is 50 Hz. In the past,Thailand conformed to the American plug and socket standard (types A &B),which,from a safety perspective,was not the wisest choice.

Can I use a power socket in Thailand?

All power sockets in Thailand provide a standard voltage of 220V with a standard frequency of 50Hz. You can use all your equipment in Thailand if the outlet voltage in your own country is between 220V-240V. This is the case in most of Europe, Australia, the United Kingdom and most countries in Africa and Asia.

Does Thailand use 220V?

Here's what travelers from different regions need to know about voltage and frequency in Thailand. Thailand uses 220V,which is compatible with devices from regions such as Europe (e.g.,Germany,France,Spain),Australia,New Zealand,and countries like Singapore and Malaysia.

Do I need a voltage converter in Thailand?

Yes,the electrical outlets in Thailand are the same as in the United States,both countries use power plugs and electrical outlets of types A and B. However,the voltage and/or frequency used in Thailand is not the same as in the United States,so you may need a voltage converter. Do I need a travel adapter for Thailand?
