

Guyana BESS House Outdoor Power Supply

What is a Bess & how will it impact Guyana?

The arrival of the BESS follows the earlier delivery of two gas turbines, each capable of generating 45 megawatts of electricity. Together, these components are expected to enhance the reliability of Guyana's national grid, reduce carbon emissions, and support the delivery of more affordable electricity.

What is a Bess battery?

The BESS forms a critical part of the power plant's emergency support system and is engineered to ensure uninterrupted energy delivery in the event of turbine failure. The inclusion of this advanced battery system reinforces LNDCH4's commitment to delivering a reliable power solution for Guyana.

What is the John Fernandes Wharf Power System?

The system arrived at the John Fernandes Wharf in Georgetown in 22 containers and will serve as the facility's emergency support in the event of turbine failure. It comprises battery racks, six inverters, auxiliary transformers, and a fully integrated power distribution center (PDC) shelter.
