When is Italy's leading energy storage event 2026?

Join us on April 15-16, 2026 for the 3rd edition of Italy's leading event on energy storage. The 2025 edition confirmed that energy storage is steadily advancing, with important regulatory updates, stronger public support at both EU and national levels, and increasing project execution.

How many MW of solar PV are there in Italy?

With over 100 MW of operational solar PV assets across 14 Italian regions, the company has recently completed the acquisition of a major national portfolio of electrochemical storage projects at various stages of maturity and spread throughout the country.

Will Italy be able to connect a photovoltaic plant to the electricity network?

The majority of existing battery systems in Italy are connected to a photovoltaic plant, so this will be one of the first stand-alone battery projects connecting directly to the electricity network. Italy has commendable plans to bring renewables' share of final gross electricity production to 73% by 2030 and 95-100% by 2050.

How many GW of batteries will be added in Italy by 2030?

"We expect 10.5 GW [of battery projects] to be added in Italy by 2030, of which 3 GW are already in an advanced stage so they will probably come online within the next two to three years," said Eva Zimmermann, senior associate for flexible energy at Aurora, recently told pv magazine Italia.
