

What is a solar roof?

Solar Roof is the most durable roof available and the glass itself will come with a warranty for the lifetime of your house, or infinity, whichever comes first. Customers may place an order for Solar Roof today on the Tesla website.

What is a Solarglass Roof?

The Solarglass Roof is made of transparent tempered glass that is three times more durable than conventional roof tiles. It has the highest ratings in hail (Class 4), fire (Class A) and windproof (Class F) tests, demonstrating excellent durability.

Can a solar green roof be installed on a flat roof?

For the end users, the yield of solar panels is naturally of high importance. A green roof, installed underneath and around the PV panels, can boost the energy yield with 6 to 10%! Therefore, we recommend installing a Solar Green Roof on flat roofs with a 0 to 5 degree pitch. What is a Solar Green Roof system?

Are solarplexus in-roof glasses a good idea?

One of the answers lies in self-generated energy. With SOLARplexus In-roof glasses, aesthetically designed photovoltaics are efficiently put on the roof. The eyesore of added unsightly frames on top of the roof are no longer needed because the PV cells are integrated directly into the laminated safety glass roof tiles. **IS SIMPLY BETTER!**

Are in-roof solar panels right for Your House?

They integrate smoothly into your roof during construction or when you're replacing an old roof, avoiding the visual clutter of typical installations. Blending seamlessly with your roofline, in-roof solar panels can be a game-changer for your home. Here's why:

Does a solarplexus roof need a new roof substructure?

The eyesore of added unsightly frames on top of the roof are no longer needed because the PV cells are integrated directly into the laminated safety glass roof tiles. **IS SIMPLY BETTER!** The change to SOLARplexus roofing tiles does not require a change from the proven existing warm roof substructure.
