

How reliable is Canadian Solar's Dymond double glass module?

Canadian Solar's Dymond double glass module passed 3 times IEC standard test and IEC 61730-2:2016 multiple combination of limit test and obtained VDE report, which fully indicate high lifetime and high reliability of this double glass module. This paper presents a detailed reliability study of Canadian Solar's Dymond double glass module.

What is a double-glass solar module?

**ABSTRACT:** Double-glass modules provide a heavy-duty solution for harsh environments with high temperature, high humidity or high UV conditions that usually impact the reliability of traditional solar modules with backsheets.

What is double glass photovoltaic module?

**Preface** To further extend the service life of photovoltaic modules, double glass photovoltaic module has recently been developed and studied in the PV community. Double glass module contains two sheets of glass, whereby the back sheet is made of heat strengthened (semi-tempered) glass to substitute the traditional polymer backsheet.

Are double glass modules better than traditional modules?

Compared to traditional modules with backsheets, modules with double glass are stronger and more durable, presenting less degradation due to thermal cycling stress. Results from the thermal cycling test up to 400 cycles show about 35% to 43% less degradation with double-glass modules than with traditional modules with backsheets (Fig. 3).

What is the encapsulation reliability risk of double glass module?

The double glass module is superior to the conventional single glass module, which indicates that the encapsulation reliability risk of double glass module is good without delaminating risk. 90 Jing Tang et al. /Energy Procedia 130 (2017) 87-93; J. Tang et al. /Energy Procedia 100 (2017) 100-100 Fig. 3.

What is a double glass module?

Double glass module contains two sheets of glass, whereby the back sheet is made of heat strengthened (semi-tempered) glass to substitute the traditional polymer backsheet. With \*Corresponding author. Tel.: +86 13776101913; fax: +86 51268961413.

**Dymond Panels** You have to break a lot of ground to find a diamond. Canadian Solar's new Dymond panel is no exception. Also known as the double-glass module, this innovative ...
